

Create Quality Patient Care and Practice Growth with Laser Dynamics

Ready to enter the laser world?

Or have an “unused” laser in the closet?

Create a niche practice by moving into laser minimally invasive dentistry. From periodontal management to various soft and hard tissue procedures, laser technology creates positive case acceptance. Determine the appropriate laser for your practice by utilizing a defined decision protocol for productive use of the laser.

Lasers offer a safe and effective alternative for a wide range of dental procedures. Some of the advantages include: increased precision, controlled bleeding, accelerated healing, reduced post-operative issues, shorter procedure time, less pain, greater case acceptance and a more relaxed experience for the patient. Explore manipulating gingivae for access, esthetics, and restorative ease.

***Suggested Audience:** General Dentist, Periodontist, Team • **Suggested Format:** Lecture or Keynote
Presentation typically qualifies for up to 3 CEU*

Learning Objectives:

- Determine the effectiveness of utilizing various laser wavelengths for soft and hard tissue
- Review the characteristics of a smart laser acquisition: cost, size, and ease of use
- Consider laser applications to nonsurgical periodontics
- Understand indications for using laser in crown lengthening and pre-orthodontic procedures including esthetics, frenectomy and troughing
- Explore effective communication strategies for laser case acceptance with emphasis on patient comfort
- Review third party coding for laser procedures
